

Turbo Killstreak

Description

"Turbo Killstreak" is a variation of "Turbo" which is also on the platform. It is a great drill if you have 4 goaltenders or more at your ice session and adds a level of variation which players will really enjoy.. Keep score to add intensity and ensure players aren't cheating by leaving the blue lines to quickly on the transition attack. To score players will really have to dial in their release and hit spots. Goaltenders must work in random which is challenging!!!
