ASCEND 
PEDIATRICS

AN ALL INCLUSIVE
PEDIATRIC THERAPY CLINIC
IN COCHRANE

WHO WE ARE

Welcome to Ascend Pediatrics! We are an inclusive pediatric therapy clinic in Cochrane, AB for infants, kids, teens, and their families. Our team is made up of occupational therapists, physiotherapists, speech language pathologists, and psychologists. We offer private services and work with FSCD contracts.

OUR SERVICES

Occupational Therapy

Our occupational therapy services support children and their families in all areas of their daily lives. We address areas of play, self-care, sensory and emotional regulation, attention, social skills, routines and so much more! We also specialize in picky eating and can help make your meal times more positive.

Physiotherapy

We help infants, toddlers and children move better! We help kids develop their motor skills including crawling, sitting, walking, running, jumping, throwing and riding a bike. Our physiotherapy services can help your child get back to play and movement following an injury, surgery or major health event.

Speech Language Pathology

SLPs help children who have difficulty forming specific words or sounds correctly as well as making sentences flow smoothly. Our SLPs love to play! She can help children develop their play skills and learn how to interact with peers within a social environment.

Psychology

Providing strategies and plans to help address cognitive, academic, behavioural, or emotional concerns is an excellent way for our Psychologists to support your child and family! We'll work to build social skills and relationships, emotional regulation strategies, and work on positive mental health engagement.
